### Note 4 - Performance fee

### - For AGCM Fund - Asia Growth Sub-Fund

In addition to the investment management services fee, a performance fee is calculated and charged as follows for the WP EUR Unit class, as specified in the table below and in accordance with the principles outlined below.

Performance Fee Mechanism	High Water Mark + Hurdle
Calculation Period	Annually corresponding to the Fund's financial year
Crystallisation Frequency	Annually at the end of the Fund's financial year
Hurdle Rate	EUR003M + 5% annual rate
Performance Fee Rate	20%
Performance Reference Period	Life of the Sub-Fund

The performance fee is accrued daily based on the outstanding number of Units on the Valuation Day (before adjusting the NAV as per the Swing Pricing section) and payable annually (as per the last business day of the Sub-Fund's financial year) based on the performance of the Net Asset Value per Unit above the Hurdle Rate during the calculation period.

The Performance Fee is calculated as follows: it is equal to the number of Units in the WP EUR Unit class multiplied by the Performance Fee Rate, which corresponds to 20% multiplied by the appreciation of the Net Asset Value per Unit in excess of the performance of the benchmark interest rate, EUR003M with a + 5 percentage Hurdle, recorded that Valuation Day, subject to a High Water Mark.

The High Water Mark is the highest Net Asset Value per Unit at which a performance fee becomes payable (or the initial Net Asset Value if no performance fee has ever been paid). If at the end of a Calculation Period the performance of the Net Asset Value per Unit has not reached the Hurdle Rate, then this underperformance must be made up in the following Calculation Periods before a Performance Fee can be paid.

The Hurdle Rate is cumulated during each Calculation Period where Performance Fees are not paid.

This ensures that before a Performance Fee is paid out, both the High Water Mark and the Hurdle Rate from previous Calculation Periods and that of the current Calculation Period year must be exceeded.

The performance reference period over which the performance of the Sub-Fund is measured and compared with that of the Hurdle Rate is the life of the Sub-Fund, meaning that the Investment Manager needs to rebuild the performance before being able to receive any new Performance Fee.

In any case, the hurdle's value (EUR003M + 5%) must at all times be at zero or above in order for a Performance Fee to become payable.

Artificial increases resulting from new subscriptions should not be taken into account when calculating fund performance.

Any Performance Fee calculated on redemption proceeds for the WP EUR Unit class is crystallised daily and paid annually in arrears within 30 days of the Sub-Fund's financial year. A Unitholder redeeming Units in the course of the calendar year will not have the whole year as the period of calculation.

### - For AGCM Fund - China Stars Sub-Fund

In addition to the investment management services fee, a performance fee of 10% of the total net return is calculated and charged for the unit classes RC1 SEK, RC2 SEK, RC8 SEK, and IC4 SEK.

### Notes to the financial statements (continued)

as at 31st March 2024

The performance fee is accrued daily based on the number of units on the Valuation Day (before adjusting the NAV as per the Swing Pricing section) and payable annually at the end of the Sub-Fund's financial year, based on the performance of the Net Asset Value per unit subject to the High Water Mark.

The Performance Fee is calculated as follows: it is equal to the number of Units in the relevant Unit class multiplied by the Performance Fee Rate, which corresponds to 10% multiplied by the appreciation of the Net Asset Value per Unit in excess of the High Water Mark, accrued each Valuation Day.

The performance fee is charged per Unit to the unit holders. A High Water Mark principle applies which means that a performance fee is only charged if there has been a positive return to unit holders since such fee was previously charged to the Net Asset Value.

The High Water Mark is the greater of the Net Asset Value per Unit at the time of issue and the Net Asset Value per Unit (after the deduction of performance fees) achieved at the end of the previous Performance Fee calculation period for which a performance fee was calculated and paid. The Performance Reference Period is the life of the Sub-Fund and there will be no reset of the High Water Mark.

In the event that an investor redeems Units prior to the end of the calculation period, any accrued but unpaid performance fee relating to those Unit classes is crystallised and paid to the Investment Manager as per the last business day of the financial year.

Artificial increases resulting from new subscriptions should not be taken into account when calculating fund performance.

### - For AGCM Fund - Asia Dividend Fund

In addition to the investment management services fee, a performance fee of 10% of the total net return is calculated and charged for the unit classes RC1 SEK and ID1 SEK.

The performance fee is accrued daily based on the number of units on the Valuation Day (before adjusting the NAV as per the Swing Pricing section) and payable annually at the end of the Sub-Fund's financial year, based on the performance of the Net Asset Value per unit subject to the High Water Mark.

The Performance Fee is calculated as follows: it is equal to the number of Units in the relevant Unit class multiplied by the Performance Fee Rate, which corresponds to 10% multiplied by the appreciation of the Net Asset Value per Unit in excess of the High Water Mark, accrued each Valuation Day.

The performance fee is charged per Unit to the unit holders. A High Water Mark principle applies which means that a performance fee is only charged if there has been a positive return to unit holders since such fee was previously charged to the Net Asset Value.

The High Water Mark is the greater of the Net Asset Value per Unit at the time of issue and the Net Asset Value per Unit (after the deduction of performance fees) achieved at the end of the previous calculation period for which a performance fee was calculated and paid. The Performance Reference Period is the life of the Sub-Fund and there will be no reset of the High Water Mark.

In the event that an investor redeems Units prior to the end of the calculation period, any accrued but unpaid performance fee relating to those Unit classes is crystallised and paid to the Investment Manager as per the last business day of the financial year.

Artificial increases resulting from new subscriptions should not be taken into account when calculating fund performance.

### Note 5 - Subscription duty ("taxe d'abonnement")

The Fund is governed by Luxembourg law.

Pursuant to the legislation and regulations which are prevailing, the Fund is subject to an annual subscription duty ("taxe d'abonnement") of 0.05% which is payable quarterly and calculated on the basis of the net assets of the Sub-Funds on the last day of each quarter.

The rate of this tax is reduced to 0.01% of the value of the net assets for Sub-Funds or Classes of Unit reserved for Institutional Investors.

According to Article 175 (a) of the amended Law of 17th December 2010, the net assets invested in Undertakings for Collective Investment already subject to the "taxe d'abonnement" are exempt from this tax.

### Note 6 - Swing pricing

Under certain circumstances (for example, large volumes of deals) investment and/or disinvestment costs may have an adverse effect on the Unitholders' interests in a Sub-Fund. In order to prevent this effect, called "dilution", the Management Company has the authority to allow for the Net Asset Value per Unit to be adjusted by effective dealing and other costs and fiscal charges which would be payable on the effective acquisition or disposal of assets in the relevant Sub-Fund if the net capital activity exceeds, as a consequence of the sum of all subscriptions, redemptions or conversions in such a Sub-Fund, such threshold percentage (the "Threshold") as may be determined from time to time by the Management Company, of the Sub-Fund's total net assets on a given Valuation Day.

Description of the swing pricing procedure:

If the net capital activity for a given Valuation Day leads to a net inflow of assets in excess of the Threshold in the relevant Sub-Fund, the Net Asset Value used to process all subscriptions, redemptions or conversions in such a Sub-Fund is adjusted upwards by the swing factor that shall be determined from time to time by the Management Company but will not exceed 1% of the relevant Net Asset Value.

If the net capital activity for a given Valuation Day leads to a net outflow of assets in excess of the Threshold in the relevant Sub-Fund, the Net Asset Value used to process all subscriptions, redemptions or conversions in such a Sub-Fund is adjusted downwards by the swing factor that shall be determined from time to time by the Management Company but will not exceed 1% of the relevant Net Asset Value.

There was no "Swing Pricing" applied for the Net Asset Value as at 31st March 2024 for the Sub-Funds nor during the year.

The Management Company continuously monitors the situation in Russia and makes fair value adjustments to the valuation of assets, if considered necessary.
